

Wise Content Factory (WCF)

Owner: WiseAitechs | Version: 1.0 | Status: Core AI Engine

SUMMARY

The Knowledge Engine is the intelligence layer responsible for collecting, organizing, validating, indexing, and serving knowledge throughout Wise Content Factory. Its responsibility is not to generate content. Its responsibility is to ensure every AI-generated output is grounded in trusted, relevant, and up-to-date knowledge.

TECHNICAL SKILLS

Collect knowledge
Normalize knowledge
Validate knowledge
Organize knowledge
Index knowledge
Cache knowledge
Search knowledge
Summarize knowledge
Ground AI responses
Prevent hallucinations
Reuse existing knowledge
Semantic Search
Keyword Search
Hybrid Search
Entity Search
Relationship Search
Time-based Search
Project Search
Brand Search
Similarity Search
NotebookLM MCP
Filesystem MCP
GitHub MCP
Browser MCP
Google Drive MCP
OmniRoute
Access Control
Encryption
Permission Levels
Audit Logging
Lazy-load large documents
Parallel document processing
Incremental indexing
Background synchronization

PURPOSE

The Knowledge Engine is the intelligence layer responsible for collecting, organizing, validating, indexing, and serving knowledge throughout Wise Content Factory. Every AI Agent should consume knowledge through the Knowledge Engine instead of accessing documents directly.

PHILOSOPHY

Knowledge should exist once. Everyone should reuse it. The Knowledge Engine transforms scattered information into structured intelligence. Knowledge is a reusable asset.

CORE OBJECTIVES

Accurate; Searchable; Reusable; Traceable; Versioned; Cached; Secure; Provider Independent.

KNOWLEDGE SOURCES

Initially supports: NotebookLM MCP, PDF, DOCX, Markdown, Plain Text, Website URLs, Google Docs, Google Sheets, PowerPoint, Research Papers, Medical Journals, Blog Articles, YouTube Transcripts, Images, Audio Notes, Videos, GitHub Repositories, Local Files, Project Documents, Brand Documentation.

DEFINITION OF DONE

Every document can be imported. Every source becomes structured knowledge. Knowledge is searchable and reusable. AI responses are grounded. NotebookLM is optional. Knowledge is cached and versioned. Knowledge improves over time. Agents consume knowledge through one consistent interface.

FINAL STATEMENT

The Knowledge Engine is the institutional memory of Wise Content Factory. It transforms documents into intelligence, information into reusable assets, and isolated files into connected knowledge. The quality of Wise Content Factory depends on the quality, organization, and accessibility of managed knowledge.
